

SERVICE INFORMATION

KN PharmaChain Seafreight

GxP compliant reefer pharma network around the globe

Kuehne + Nagel meets the demanding requirements of the pharmaceutical and healthcare industry by means of certified logistics concept. This includes, for example, the compliance with exact temperature ranges as well as the provision of special trans-shipment places and storage locations. Shipments are carried out in specific transport containers such as seafreight reefer containers and multi-zone thermo trucks.

KN PHARMACHAIN SERVICES

- GxP compliant pharma network: 30 standardised GxP compliant pharma stations worldwide by end of 2016
- Global visibility, door-to-door with KN Login - 24/7/365 access to shipment information and shipment documents
- Carrier and lane risk assessment: usage of only selected and approved carriers and truckers; lane risk assessment analyse for each client and lane
- Pharma specific SOPs and Kuehne + Nagel working instructions - GxP compliant and QSHE approved working instructions and SOPs for all processes
- Specialised pharma training for all KN PharmaChain staff - annual live and computer based trainings at SOP level

VALUE-ADDED SERVICE

- In-transit temperature monitoring "Locustraxx": In-transit shipment temperature and position monitoring, data visible via KN Login, automatic e-mail alerts for temperature deviations
- Label "Plug Immediately": Aims to reduce off-power times at terminal, raises awareness for risk of all involved personnel throughout the cold chain
- Air-to-Sea Methodology developed to support airfreight to seafreight mode shift; uninterrupted supply during the air-to-sea conversion
- LCL pharma service: GxP compliant LCL services for pharma products at +15°C to +25°C to Singapore and Sydney
- Consultancy: Reefer loading and packaging consultancy, technical reefer workshops, shipment optimization etc.

YOUR BENEFITS

- Reduced regulatory concern from superior compliance
- Greater peace of mind through increased reliability
- Identification of potential transport risks in advance based upon shipping requirements
- Less time spent on day-to-day operational issues
- Reduced losses due to enhanced visibility, traceability – increased customer satisfaction
- Quality by design – get it right first time!
- Total cost of product ownership optimized
- Patient needs are better served
